## OBJECTIVE

Electronics and Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning (AI/ML), with hands-on experience in IoT, embedded systems, and software development. Gained practical exposure to defense systems engineering and certified in microcontrollers, machine learning, and signal processing. Seeking opportunities to apply technical skills in real-world engineering and intelligent technology solutions.

## EDUCATION

B.Tech – Electronics and Computer Science Engineering (AI/ML Specialization)

Christ University, Bangalore

Expected Graduation: 2028

## EXPERIENCE

Engineering Intern – Naval Systems (Sonar & Communication)

Bharat Electronics Limited (BEL), Bangalore

April 2026 – May 2026

- Gained exposure to naval defense systems including sonar and communication technologies
- Rotated across Design, Production, Quality Assurance, Assembly, and System Integration
- Observed complete lifecycle of systems from design to deployment
- Understood testing, validation, and reliability engineering processes
- Developed knowledge of system integration and cross-functional collaboration

## PROJECTS

### Wi-Fi Range Extender using Raspberry Pi

- Built a cost-effective Wi-Fi extender to eliminate network dead zones
- Configured hostapd and dnsmasq for access point and DHCP services
- Implemented NAT routing and monitoring dashboard

### IoT-Based Fire & Gas Leakage Alert System

- Designed real-time monitoring system using ESP32 and sensors
- Integrated ThingSpeak cloud platform for remote data visualization
- Implemented automated alert system

### SafeTrack – Women Safety Monitoring System

- Developed IoT-based wearable safety system using ESP32 and GPS
- Implemented real-time tracking and emergency alert system

### Hospital Management System (SQL)

- Designed relational database with structured schema and relationships
- Performed CRUD operations and optimized SQL queries

### Food Delivery Application (Java)

- Developed application using core Java and object-oriented programming
- Implemented user interaction and order processing

### Signal Noise Cancellation System (MATLAB)

- Applied filtering techniques for noise reduction in audio signals

- Analyzed signals using MATLAB

## SKILLS

Programming: Python, C, Java, SQL

### Core Areas:

Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Digital Electronics, Signals and Systems, Microcontroller-Based System Design, Applied Industrial IoT

### Tools & Technologies:

MATLAB, ThingSpeak, Arduino, ESP32, EDSIM51, VS Code, Cisco Packet Tracer, Tinkercad, Run SQL Command Line, Keil uVision5, Ubuntu

Other Skills: Data Analytics Basics, Cybersecurity Fundamentals, AI/ML Fundamentals

## CERTIFICATIONS

- Industrial Applications of Microcontrollers – L&T EduTech (First Class)
- Introduction to Machine Learning – NPTEL (Elite)
- Introduction to Cybersecurity – Cisco Networking Academy
- Signal Processing Onramp – MathWorks
- Troubleshooting Electronic Circuits using Computer-Aided Tools – Christ University

## ACHIEVEMENTS & ACTIVITIES

- Completed internship at Bharat Electronics Limited (Naval Systems Division)
- Built multiple real-world projects integrating IoT, embedded systems, and software
- Completed certifications in AI/ML, embedded systems, and signal processing

## INTERESTS

- Artificial Intelligence & Machine Learning
- Data Analytics & Data Science
- Full Stack Web Development
- Cybersecurity & Ethical Hacking
- Embedded Systems & IoT
- Software Development & Problem Solving
- Intelligent Systems & Automation
- Defense Electronics & Communication Systems
